

IDEATION PHASE PROBLEM STATEMENTS

DATE	4 October 2022
TEAM ID	PNT2022TMID15525
PROJECT NAME	News Tracker Application
MAXIMUM MARKS	2 Marks

Problem Statement :

As our lives are very busy these days, we often feel we need more than 24 hrs. a day to cope up with everything we have in our schedule. Well, that's not possible but reducing the time by changing the conventional method of reading news can help. Just tell us what market news you're interested in and get a quick peek for the day. Only read what you feel is relevant and save your time. This app helps you to query for all information about Indices, Commodities, Currencies, Future Rates, Bonds, etc...,

I am	The people who wants to read news based on their interest.
I'm trying to	Collect the information from the user search history.
But	I am unaware of the existing technology that can help me a lot to analyze ongoing information.
Because	I don't want to waste user's time and their interest.
Which makes me feel	I'm not able to understand user's current situation by that I'm not able to fulfill the user's expectation.
